Why choose PolySto?

PolySto provides maximum protection for hygienic areas, from floor to ceiling.

As a Belgian company with over 30 years of expertise, we design and manufacture hygienic building materials tailored to demanding industries like food processing, pharmaceuticals, life sciences, and healthcare. Our mission is to provide durable, high-quality solutions that uphold hygiene and food safety, even in the toughest conditions.

Our product range includes prefabricated **CleanRock** kerbs, coved skirtings, polyethylene wall ledges, stainless steel posts, and bollards—all engineered for maximum hygiene and impact resistance. We also offer **CleanSheet** wall and ceiling systems, designed with anti-fungal, water-repellent, and scratch-resistant properties. These FRP solutions comply with food safety and HACCP standards, making them easy to clean and ideal for facilities aiming to achieve the highest hygiene standards.

THE IMPORTANCE OF HYGIENE

Harmful bacteria such as Listeria and Salmonella hide in voids, cracks, open joints, behind kerbs, and on corroded surfaces.

*Daily cleaning can flush these bacteria from cracks and crevices, dispersing them throughout the production area. This can lead to serious **bacterial contamination** on food production surfaces, potentially resulting in foodborne illnesses, production halts, or even complete factory shutdowns.*

A TOTAL HYGIENIC DESIGN SOLUTION

For the food and beverage industry, life sciences, and health sector

PolySto provides maximum protection for hygienic areas, from floor to ceiling!

The aim of the PolySto hygienic design concept is to enable easy cleaning and fast evacuation of humidity and biomass, preventing the growth of harmful bacteria

Humidity

Biomass

PolySto Group developed an extensive range of hygienic construction products consisting of:

- Prefabricated hygienic CleanSheet walls and ceilings
- Prefabricated hygienic CleanRock kerbs
- HygiSeal®
- Prefabricated Food Safe PVC covered skirtings
- Modular polyethylene wall ledges
- Stainless steel posts and barriers
- Stainless steel column protection
- Stainless steel drainage
- Hygienic windows and doors
- Hygienic (LED) lightings
- Hygienic wall boots

WE HAVE MORE TO OFFER

CONSULTANCY

Each project is unique. Our team of experts, active in over 100 countries worldwide can advise on how to build your project to comply with the highest level of hygienic standards.

PolySto is expert member of EHEDG, Co-author of EHEDG hygienic building guidelines, doc 44.

PROJECT CALCULATION

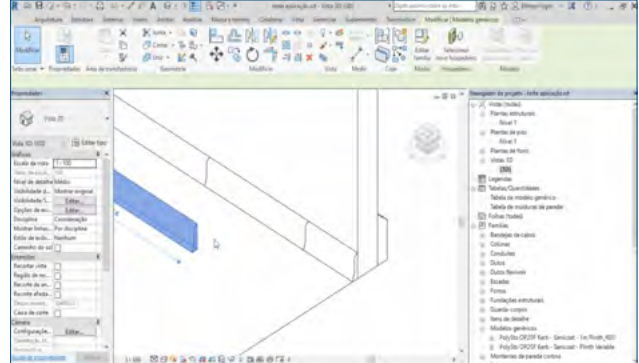

Project calculation from A-Z

An experienced and motivated Internal Sales team provides your tailor-made quotations.

A personal approach is key. Together with your sales representative, the internal sales team is responsible to calculate your project with the necessary technical support.

In order to prepare a swift and detailed calculation, we always ask to provide a digital CAD drawing.

Building information modeling (BIM)

You can consult our **extensive BIM-library** in the document catalog on our [website](#).

The PolySto BIM models can be extracted, exchanged or networked to support decision-making regarding your new or renovation built assets.

Apart from detailed technical drawings, the BIM library contains a full technical description of all CleanRock kerbs which can be useful for tender and project specifications.

MASTER INSTALLERS

The approach towards new construction or renovation of your food safe areas require specialized expertise. PolySto Group looks back on **30 years of experience** in hygienic construction.

In BeNeLux we have our own **certified installation teams** who take on the daily challenges to complete hygienic renovations or new construction projects.

Through insight into the **construction details**, technical expertise and attention to safety, reliability and flexibility, we are able to offer suitable and responsible solutions for the food-safe finish of all areas where hygienic and **HACCP finish** are required, taking into account the construction costs, quality, predetermined planning and safety.

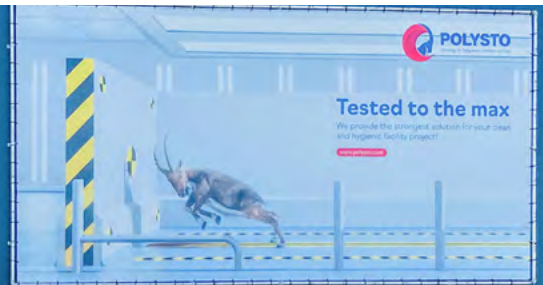

PolySto Group BV cooperates with dedicated partners and installation companies throughout the world.

To achieve the label **'master installer'** we offer specific training sessions in our academy.

Interested in becoming a Master Installer?

Contact us!

- Trained Master Installers worldwide
- Experts in PolySto hygienic construction
- Masters of installation
- Perfectionists into finest details
- PolySto **ambassadors**
- Bring **total** hygienic solutions
- Share knowledge in the **PolySto community**

CLEANSHEET TECHNOLOGY

CLASSIC BUILDING MATERIALS

What are the problems with classic wall and ceiling building materials?

Sandwich panels

Concrete

Brick walls

Stainless steel panels

Ceramic tiles

Degradation and corrosion of wall & ceiling panels due to:

Cleaning agents - unsuitable or inappropriate use:

- Temperature
- Concentration
- Mix of detergents
- Cleaning equipment: e.g. brushes
high pressure devices

Mechanical impact

- Poor or lack of good wall protection
- Scratches and point impacts
- Normal wear and tear

Humidity

- Humid production processes
- Temperature fluctuations
- Poor or insufficient ventilation

Natural products (agressive)

- Blood
- Starch
- Salts
- ...

Resulting in:

- High risk of bacterial contamination
- Development of moulds and fungus
- Possible production interruptions or stops

WHY CLEANSHEET?

Introducing PolySto **CleanSheet** — the future of hygienic construction materials. Made from Fiberglass Reinforced Polyester (FRP), CleanSheet embodies both **strength** and **durability**. It stands apart with its resistance to rust, decay, and its minimal maintenance needs, making it a superior alternative to traditional building materials.

Suitable for various applications, including walls, ceilings, and cladding. CleanSheet is a sound choice for those seeking an efficient and long-lasting construction solution.

Smooth (+film),
Smooth matt (+film)
Smooth glossy (+ film)
Smooth + SR film

Embossed
Embossed + SR film

Non-corrosive / chemical resistant

Easy to clean

Very quick and easy installation

Extreme low bacterial adhesion

CLEANSHEET

Finishing options

EMBOSSED

- Lowest bacterial adhesion
- Ideal for daily industrial foam cleaning
- 30% less foam consumption
- Diffused light reflection for relaxed atmosphere

SMOOTH

- Perfect for dry environments
- Sleek and polished appearance

SMOOTH MAT

- Low reflection
- Matt look
- Pharma and Cleanroom

SMOOTH GLOSSY

- Extra smooth
- Pharma and Cleanroom

Application

Directly adhered to all **flat and smooth** surfaces, such as:

- Sandwichpanels
- Concrete/cement walls
- Ceramic tiles
- Plaster, gypsum board, cement board
- OSB-panel

Euro Class

CleanSheets are available in **2 fire classes**

- Euro Class E
- Euro Class B-S2,D0

CLEANSHEET page 18

Fiber glass reinforced composite polyester sheet for the hygienic and durable protection of walls and ceilings.

- Installation on smooth, straight surfaces - f.e. concrete, tiles, sandwich panels, etc...
- For renovation and new build projects

RAMPANEL page 20

Cement-based support laminated with CleanSheet. High-impact solution ideal for refurbishing walls in disrepair or for rooms demanding superior fire resistance and thermal stability.

- Installation on uneven surfaces which demand high strength. F.e. concrete, tiles, sandwich panels, metal studs, etc...
- Impact and scratch proof
- For renovation and new build projects

HYGIWALL page 22

Premium sandwich construction panel solution with a PIR or mineral wool core, tailored for optimal insulation. Each panel is seamlessly laminated on one or both sides with our durable PolySto CleanSheet.

- For renovation and new build constructions
- Ideal for box-in-box projects
- For inner, non-supporting walls and self-supported ceilings
- HygiWall panels produced up to 11 meters length

INSUPANEL page 26

A laminated insulation panel, with PolySto CleanSheet, designed for walls and ceilings that demand extra insulation.

- For renovation and new build
- Lightweight suitable for ceiling renovations
- When extra insulation is needed

RENOPANEL page 28

An advanced, lightweight panel constructed from robust polypropylene with high-grade PolySto CleanSheet lamination.

- For renovation and new build
- Lightweight suitable for ceiling renovations

HYGICEILING page 30

Hygienic and washable CleanSheet ceiling tiles, designed for suspended ceilings, offering an easily maintainable solution for diverse environments.

- For renovation and new build
- Washable in industrial dishwasher

CLEANROCK TECHNOLOGY

What are the problems with classic wall protection building materials?

Concrete kerbs with resin-epoxy coating:

- Very long installation times
- Aggressive water/concrete mixture causes corrosion to sandwich panels
- Physical impacts causes cracks
- Difficult and expensive to maintain
- Water and biomass infiltration cause growth of harmful bacteria

Resin and tile covered skirtings:

- Expensive and brittle
- Not a wall protection
- Due to temperature changes, impact ruptures the skirting
- Infiltrated water in the floor evaporates and causes the resin floor to break

Stainless steel shells filled on site with concrete:

- Very complex installation with skilled labor and specialized tools.
- Voids behind stainless steel surface can harbor bacteria
- Difficult to repair or maintain
- Cold bridge effect
- Corrosion and scratch sensitive

Hollow, flexible PVC covered skirtings:

- Very brittle
- Hollow spaces behind the surface which is ideal for bacteria growth
- Weak and chemically not stable
- Flexible rubber joints are not watertight and chemical resistant

Resulting in:

- High risk of bacterial contamination
- Possible production interruptions or stops
- High installation and maintenance costs

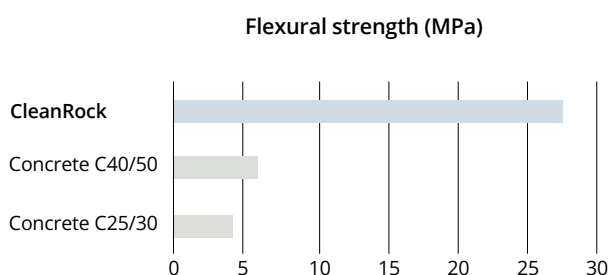

CleanRock

CleanRock is the **patented core material** used in PolySto kerbs. The composition has been developed based on more than 30 years of experience in the food processing industry.

Prefabricated CleanRock kerbs are composed of a mixture of polyester resins, quartz granulates and additives. The **unique composition** allows to prevent contaminations with Salmonella and Listeria. CleanRock is ideal for **food safe environments** that have to comply with HACCP, EU, USDA, GFSI, BRC and other food safety standards.

5 x stronger than concrete

No water absorption!

Double water barrier

Prefabricated & modular system

- ✓ Installed before or after floor installation
- ✓ Fast installation
- ✓ Easy replacement

HYGISEAL

What are the problems with classic sealants in the food Industry?

Silicone joints

- Poor resistance to high pressure cleaning
- Anti-fungal agents are rinsed out by cleaning
- (Black) mould on silicone joints
- High maintenance cost
- Higher risk for production interruption due to maintenance
- High risk of bacteria outbreak

WHY HYGISEAL?

HygiSeal 3.1 is our latest innovation in the field of chemical welding, specifically designed for joints using a single-component hybrid sealant. HygiSeal joints create a **seamless**, enduring, and **fungus-repellent** connection between PolySto components, as well as between floors and walls. Engineered to withstand the challenges of **high-pressure cleaning**, these joints retain their **durability** even when exposed to the most demanding cleaning processes.

The unique composition of HygiSeal 3.1 provides a hard and smooth surface, which significantly **reduces bacterial adhesion** compared to traditional food-safe silicones. HygiSeal is the perfect solution for industries that demand strict hygiene standards.

The total hygienic design solution for sealing of:

- Kerbs and skirtings
- Windows
- Doors
- Sandwich panels
- Walls
- Ceilings
-

HYGICEILING STRUCTURES (ANTI-CORROSION)

	Description	# per box
CMC_LP_3,05	CMC T24 L edge profile, white, anti-corrosion, 3050 x 24 mm	40 pc
CMC_MP_3,6	CMC T24 main runner profile, white, anti-corrosion, 3600 x 24 mm	25 pc
CMC_CP_1,2	CMC T24 cross profile, white, anti-corrosion, 1200 x 24 mm	50 pc
CMC_CP_0,6	CMC T24 cross profile, white, anti-corrosion, 600 x 24 mm	75 pc
CMC_H_100/190	CMC T24 hanger 100 - 190 mm	100 pc
CMC_H_200/390	CMC T24 hanger 200 - 390 mm	100 pc
CMC_H_300/590	CMC T24 hanger 300 - 590 mm	100 pc
CMC_H_500/990	CMC T24 hanger 500 - 990 mm	100 pc
CMC_H_1000/1290	CMC T24 hanger 1.000 - 1.290 mm	50 pc
CMC_H_1200/1490	CMC T24 hanger 1.200 - 1.490 mm	50 pc
CMC_HDC1_100	CMC T24 ceiling clips HDC1	100 pc

Ceiling structures for the HygiCeiling tiles are available in full packages only. Standard colour: White RAL 9016.

HygiCeiling 595x595mm tiles in a hospital area.

Installation of HygiCeiling.

HygiCeiling in a supermarket.

CONSUMPTION GUIDELINES

Sheets and panels

The consumptions listed below in cc are per square meter of CleanSheet or laminated CleanSheet panel.

Example: 1 square meter of RamPanel requires 600cc of Hard Fix Glue. The joints can be finished with 40cc of HygiSeal. HygiSeal, sealant and Hard Fix Glue are delivered in bags of 600cc.

	Product	Hard Fix Glue / m ²	HygiSeal / m ²	Optional sealant (in combination with profiles) / m ²
Consumption	CleanSheet	600 cc	40 cc	150 cc
	RamPanel	600 cc	40 cc	/
	HygiWall	*	80 cc	80 cc
	InsuPanel	600 cc	40 cc	150 cc
	RenoPanel	600 cc	125 cc	150 cc

* The consumption of Hard Fix Glue for HygiWall serves as a guideline for applying glue in the U-profile (100 cc / running meter) and between the male and female connections (80 cc / running meter).

The estimated **installation times** include the following steps: cutting, applying profiles, glueing, and joint sealing.

Height wall = 1 panel length

Product	Installers needed for walls	Installers needed for ceilings	Renovation		New build	
			Small project < 100 m ² per day (8 hours)	Big project > 100 m ² per day (8 hours)	Small project < 250 m ² per day (8 hours)	Big project > 250 m ² per day (8 hours)
CleanSheet	2	3	30 m ²	50 m ²	40 m ²	60 m ²
RamPanel	2	/	30 m ²	50 m ²	40 m ²	60 m ²
HygiWall	2	3	50 m ²	70 m ²	70 m ²	90 m ²
InsuPanel	2	3	30 m ²	50 m ²	40 m ²	60 m ²
RenoPanel	2	3	30 m ²	50 m ²	40 m ²	60 m ²
HygiCeiling	/	3	40 m ²	50 m ²	50 m ²	60 m ²

Example: For a small project with an area less than 100 m², two installers are capable of mounting up to a total of 30 m² of CleanSheet per day.

Please note that these estimations are based on our experience and are non-binding. They are subject to the expertise of the installers and the conditions at the job site. Polysto Group BV cannot be held responsible for additional labor costs when these estimations are exceeded.

It is important to understand that each implementation has its own unique construction solution, which depends on the specific circumstances at the construction site.

When preparing a quotation, we consistently assume typical scenarios. To ensure the most accurate and detailed work, we kindly ask that you provide ample photographic or video evidence of the existing conditions when submitting price inquiries. This will help us better understand the unique requirements of your project and provide a more accurate estimation for your specific needs.

PROFILES

PVC, FRP or stainless steel profiles to finish sheets and panels.

CLEANSHEET

PFU_S_3	
Dimension	3.050 x 8 x 18 mm
Thickness	+/- 1,2 mm
Weight	0,12 kg/pc
Application	Start / end profile
Material	PVC
Suitable for	FRP sheets

PFU_304_FRP_3	
Dimension	40-6-14 mm / 3.000 mm
Thickness	0,8 mm
Weight	1 kg/pc
Application	Start / end profile
Material	Stainless steel
Suitable for	FRP sheets

RAMPANEL / RENOPANEL

PFUS_P_2B_3	
Dimension	3.000 x 12 x 35 mm
Thickness	+ - 2 mm
Weight	0,42 kg/pc
Application	Start / end profile
Material	PVC
Suitable for	RamPanel / RenoPanel

PFUS_P_2C_3	
Dimension	3.000 x 13 x 35 mm
Thickness	+ - 2 mm
Weight	0,38 kg/pc
Application	Start / end profile
Material	PVC
Suitable for	RamPanel / RenoPanel

PFO_P_2B_3	
Dimension	3.000 x 12 x 30 mm
Thickness	+ - 2 mm
Weight	0,48 kg/pc
Application	Connection / base part
Material	PVC
Suitable for	RenoPanel

PFO_P_2C_3	
Dimension	3.000 x 11 x 50 mm
Thickness	+ - 1,5 mm
Weight	1,48 kg/pc
Application	Connection / cover part
Material	PVC
Suitable for	RenoPanel

PFU_P_1_3	
Dimension	3000 x 12 x 30 mm
Thickness	+ - 2 mm
Weight	0,45 kg/pc
Application	Start / end profile
Material	PVC
Suitable for	RenoPanel
HS-Code	39 16 20 00

PFU_304_RENO_3	
Dimension	30-9-15 mm / 3.000 mm
Thickness	0,8 mm
Weight	1,5 kg/pc
Application	Start / end profile
Material	Stainless steel
Suitable for	RamPanel

PROFILES

PVC, FRP or stainless steel profiles to finish sheets and panels.

INSUPANEL

PFH_MF_3	
Dimension	3.000 x 20 x 45 mm
Thickness	+ - 2 mm
Weight	0,75 kg/pc
Application	H-profile for mounting
Material	PVC
Suitable for	InsuPanel
HS-Code	39 25 90 10

ROUNDED COVING

Aluminium base with PVC cover part. Rounded coving suitable for CleanSheet, HygiWall, RamPanel, InsuPanel, RenoPanel, sandwich panels, etc...

PFWCC_2_BAP_3	
Dimension	3.000 x 40 x 40 mm
Thickness	+ - 2 mm
Weight	0,87 kg/pc
Application	Base part
Material	Aluminium
HS-Code	76 04 29 90

PFWCC_2_100C_3	
Dimension	3.000 x 10 x 100 mm
Thickness	+ - 2 mm
Weight	0,58 kg/pc
Application	Cover part
Material	PVC
HS-Code	39 25 90 10

PFWCC_C_3IN	
3 way internal corner	
Dimension	100 x 100 mm
Weight	0,20 kg/pc
Material	PVC
Use with	PFWCC_2_100
HS-Code	39 25 90 10

PFWCC_C_2EX	
2 way external corner	
Dimension	100 x 100 mm
Weight	0,20 kg/pc
Material	PVC
Use with	PFWCC_2_100
HS-Code	39 25 90 10

PFWCC_C_EP	
End piece	
Dimension	100 mm
Weight	0,10 kg/pc
Material	PVC
Use with	PFWCC_2_100
HS-Code	39 25 90 10

The maximum ambient temperature for PVC profiles is 60°C.

ROUNDED COVING

Full-core PVC base with PVC cover part suitable for CleanSheet, RamPanel, InsuPanel & RenoPanel.

PFAPP_2_65B_3	
Dimension	3.000 x 35 x 35 mm
Thickness	+/- 10 mm
Weight	1,49 kg/pc
Application	Base part
Material	Full PVC
HS-Code	39 25 90 80

PFAPP_2_65C_3	
Dimension	3.000 x 16 x 65 mm

Weight	3 kg/pc
Application	Internal corner
Material	FRP
HS-Code	39 21 90 10

PFLP_50x50_R7_3	
Dimension	3.000 x 50 x 50 mm
Thickness	3 mm
Weight	3 kg/pc
Application	External corner
Material	FRP
HS-Code	39 21 90 10

PFZ_304_3	
Dimension	30-20-30 mm / 3.000 mm
Thickness	0,8 mm
Weight	1,5 kg/pc
Application	Cover profile
Material	Stainless steel
Suitable for	RamPanel
HS-Code	72 16 21 00

PFL_304_40*40_3	
Dimension	3.000 x 40 x 40 mm
Thickness	0,8 mm
Weight	1,5 kg/pc
Application	External corner
Material	Stainless steel
HS-Code	72 16 21 00

The maximum ambient temperature for PVC profiles is 60°C.

CLEANSHEET INNER CORNER

CLEANSHEET INNER CORNER	
PF_INSU_1,5S	30mm PIR + 1,5 mm CleanSheet smooth
PF_INSU_1,5E	30 mm PIR + 1,5 mm CleanSheet embossed
PF_INSU_FFRB1,5S	30mm PIR + 1,5mm CleanSheet smooth B,s2-d0
PF_INSU_FFRB1,5E	30mm PIR + 1,5mm CleanSheet embossed B,s2-d0

Dimension	80mm x 33 mm
Length	3.000 mm
Thickness	CleanSheet 1,5 mm
Weight	0,83 kg/pc
Application	Inner corner profile
Material	PIR insulation board CleanSheet Euroclass E / optional Euroclass B,s2-d0
Finish	Available in Embossed or Smooth CleanSheet surface
Suitable for	CleanSheet, HygiWall, RamPanel, InsuPanel, sandwich panels, etc...
HS-Code	39 25 90 10

The **CleanSheet inner corner**, crafted from PIR insulation board and CleanSheet, is engineered to meet HACCP regulations, featuring a HygiSeal joint connection.

- New construction or renovation with new HygiWall.
- Renovation with CleanSheet, RamPanel, InsuPanel
- Avoid aluminum coving profiles and hollow spaces
- Double water barrier (Hard Fix Glue + HygiSeal)
- Temperature range: -60°C / +60°C

CEILING SUSPENSION FOR HYGIWALL

NEW

SUSPENSION T-PROFILE

CS_FRP_T_80

Dimension	4.000 x 80 x 80 mm
Thickness	4 mm
Colour	RAL 9010
Weight	5,30 kg/pc
Application	Suspension profile
Material	FRP
Max. charge per hanging point	375 kg/m

CS_ALU_T_84

Dimension	4.000 x 84 x 64 mm
Thickness	3,5 mm
Colour	RAL 9010
Weight	6,20 kg/pc
Application	Suspension profile
Material	Aluminium
Max. charge per hanging point	700 kg/m

CS_T_FX

Dimension	40 mm / M10
Weight	0,10 kg/pc
Material	Galvanized steel
Application	Fixation for M10 thread

CS_T_CN

Dimension	200 x 46 mm
Weight	0,8 kg/pc
Material	Steel
Application	Connector plate & pin

CS_THREAD_M10

Dimension	M10 - 2.000 mm
Weight	1,20 kg/pc
Material	Galvanized steel
Wire	Suspension thread

POM INSERT (MUSHROOM)

CS_POM_SCREW10	
Dimension	32 x 22 mm
Thickness	+ - 6 mm
Colour	RAL 9010
Weight	0,05 kg/pc
Application	Insert for hanging of panels / objects
Material	poly acetal
Pulling force	Max 1.000 kg

CS_POM_WASH10	
Dimension	ø60 mm
Thickness	+ - 6 mm
Colour	RAL 9010
Weight	0,05 kg/pc
Application	Insert for hanging of panels / objects
Material	poly acetal
Pulling force	Max 1.000 kg

ACCESSORIES SUSPENSION

CS_TIGHT_M10	
Dimension	120x60x50mm
Thickness	+ - 4 mm
Weight	0,30 kg/pc
Application	Tightening tool threaded rod
Material	Galvanized steel

CS_CLAMP_M10	
Weight	0,20 kg/pc
Application	Girder clamp M10
Material	Galvanized steel
Pulling force	Max 230 kg

CS_ALUTAPE	
Width	50 mm / 50m
Thickness	50µ
Weight	0,60 kg/pc
Application	Insulation airtight tape
Material	PP, coated with aluminum

PU_FOAM	
Package	750 ml
Application	Insulating panels
Material	Polyurethane
Weight	1,5 kg
HS-Code	39 09 50 10

Other ceiling suspension systems available upon request.

PREFAB KERBS

3 types of finishing

NATURAL

Strong and durable CleanRock kerb with a monolithic and smooth surface.

SANICOAT

High-care CleanRock kerb with smooth gelcoat (polyester base) to provide extra protection against aggressive cleaning agents and chemicals like salt, acids, blood, starch and lactic acid.

Other colours available on request. RAL 9010

STAINLESS STEEL

1,2 mm 1.4306 Stainless steel kerbs with concrete core.

Custom sizes are possible on request.

* Impact class 5 can be reached when installing kerbs including chemical anchorage.
Straight elements of 1.500 mm need 4 drillings. Elements of 500 mm need 2 drillings per piece.

HS-Code CleanRock kerbs 39 25 90 80

PolySto prefabricated CleanRock kerbs with rebate for hexagonal tiled floors.

CONSUMPTION GUIDELINES

The consumptions listed below in cc are per linear meter of PolySto kerb.

Example: 1 meter of Polysto OP30F requires 450cc of Hard Fix Glue and when sealant is required a total of 290cc. HygiSeal, sealant and Hard Fix Glue are delivered in bags of 600cc. Chemfix in tubes of 410 cc.

	Product	Top & vertical joint	Bottom joint	Hard Fix Glue	Optional Chemfix per drilling	Installers	Installation of kerbs

* We strongly suggest to apply Sealant or HygiSeal in the same colour of the wall panel.

These estimates are based on our experience and are non-binding. They depend on installer expertise and site conditions. Polysto Group BV is not responsible for extra labor costs if estimates are exceeded.

Each implementation requires a unique construction solution, influenced by the size of the joints to be filled with sealant or HygiSeal.

If installing Polysto kerbs with chemical anchorage, an extra installer is needed to drill into the construction floor using Polysto drilling molds (refer to chemical anchorage installation instructions).

During the quotation phase, floor type and joint size are not always known. Initial calculations assume silicone for the bottom joint as standard. For flat (unstructured) floors with bottom joints no larger than 5 mm, HygiSeal may be used instead.

EXTREME IMPACT

Installing a polyethylene strip either on the front of the kerb or directly next to the wall panel provides optimal protection against **heavy impacts** in areas with frequent internal traffic and constant collisions, especially against the sharp edges of Euronorm bins.”

HygiSeal (top joint)	25 cc / lm

PE WALL PROTECTION

STAINLESS STEEL COLUMN PROTECTION

PolySto Column Boxes are stainless steel shells designed to provide effective impact protection for both drainage systems and columns. Specifically created for installation alongside PolySto prefabricated kerbs, these durable solutions help protect critical infrastructure from the impacts of daily transport activities.

	BOX_U
Material	Stainless Steel
Thickness	1,2 mm
Finishing	Vertically brushed
Height	200 - 500 mm
Application	Budget solution to protect drainage pipes and small (steel) columns
HS-Code	72 19 11 00

	BOX_Y
Material	Stainless Steel
Thickness	1,2 mm
Finishing	Vertically brushed
Height	200 - 500 mm
Application	Stainless Steel box in shape of PolySto kerb (from impact level 3) to protect drainage pipes and small (steel) columns
HS-Code	72 19 11 00

	BOX_S
Material	Stainless Steel
Thickness	1,2 mm
Finishing	Vertically brushed
Height	200 - 500 mm
Application	Premium solution to protect drainage pipes and (steel) columns
HS-Code	72 19 11 00

	BOX_R
Material	Stainless Steel
Thickness	1,2 mm
Finishing	Vertically brushed
Height	200 - 500 mm
Application	Rounded column box to protect stand alone (steel) columns. Delivered in 2 pieces
HS-Code	72 19 11 00

Custom shapes and sizes available on request.

HS-Code concrete kerbs 39 25 90 80

POLYETHYLENE LOGISTIC KERB

PolySto designed a very strong polyethylene wall protection to avoid heavy damages in busy warehousing environments. A galvanized L-profile is mounted on the construction floor using M16 anchors. A single (or double) PE500 kerb is installed on top of the galvanized L-profile and secured using hexagonal bolts every 50 cm.

Other sizes and colours available upon request!

STAINLESS STEEL DRAINAGE SYSTEMS

LINEAR DRAINAGE

Round channels

- Fast transfer of fluids to the outlet
- Reduction of bacteria accumulation
- Ecology & efficiency
- Stainless steel AISI304/316 / 2 mm thickness
- Reinforced edges
- Different gratings available
- Load class M 125 kN

POINT DRAINAGE

Point floor drains

- Highest hygienic design
- Different grates available depending on application
- Easy installation
- Hygienic trap design
- Easy and effective cleaning
- Waste basket/sediment
- Stainless steel AISI304/316 / 2 mm thickness

HYGIENIC WALL BOOTS

Pipe connections through walls are often insufficiently finished and sealed, resulting in a higher risk of bacterial contamination.

Our **hygienic wall boots** are self-sealing and, in contrast to steel or plastic rosettes, completely flexible. They stay in place and remain permanently sealed, despite pipe vibrations and movements.

The wall boots consist of a silicone-based casing and stainless steel baseplate (316). Their innovative design not only ensures a long-lasting hygienic seal but also simplifies maintenance by preventing dirt and bacteria buildup around the pipe connection. This makes the wall boots ideal for food processing, pharmaceutical, and other industries where strict hygiene standards are critical.

HYGICRYSTAL

CLIPS WINDOWS

PolySto clips windows are precision-engineered with extruded aluminum frames in various profiles for perfect fit. Features laminated glass glazing, hygroscopic crystals for condensation prevention, and custom options.

- ✓ Easy installation
- ✓ Clipped on 1 side
- ✓ Custom made
- ✓ Extruded aluminium (Option stainless steel)
- Wall thickness
 - 40 mm
 - 60 mm
 - 80 mm
 - 100 mm

SURFACE MOUNTED WINDOWS

Surface mounted windows provide a suitable solution for interior spaces, including (partition) walls, while adhering to food safety standards. Designed to prevent dirt accumulation and withstand specific conditions such as temperature, humidity, and noise.

- ✓ Food Safe & easy installation
- ✓ Welded corners
- ✓ Insulating glazing including anti-splinter film
- insulated glazing Rc value 1.3 W/m². K
- Standard size 900 x 1.200 mm (viewing size)
- Custom made sizes possible
- Wall thickness
 - 80 mm
 - 100 mm
 - 120 mm
 - 140 mm
 - 170 mm
 - 200 mm

HYGIDOOR

PolySto industrial (coldroom) doors combine durability, hygiene, and aesthetic appeal, making it a versatile choice for various settings. Constructed from CleanSheet and PU insulation, our doors ensure robustness and easy maintenance. They are ideal for cold, wet and damp environments. The unique frame system caters to different wall thicknesses, ensuring a seamless fit. Double hinged doors are available upon request.

INDUSTRIAL DOOR	
Insulated, durable temperature-controlled areas above 0°C	
Door leaf	Thickness 60 mm
	Stainless steel profile
	CleanSheet surface
Door frame	Stainless steel
	Broken thermal bridge
	Beveled edges
Door fittings	Heavy-duty hinges with disc bearings
	Stainless steel handle
Standard size	Single leaf 900 x 2.300 mm
	Single leaf 1.200 x 2.300 mm
	Double leaf 1.800 x 2.300 mm

INDUSTRIAL SLIDING DOOR	
Insulated, durable for cooling, freezing from -20°C to +12°C	
Door leaf	Thickness 80 mm
	Stainless steel profile
	CleanSheet surface
	U-value 0.264 W/m ²
Door frame	Stainless steel
	Broken thermal bridge
	Welded corners
Railsystem	Included
Standard size	900 x 2.300 mm
	1.000 x 2.300 mm
	1.200 x 2.300 mm
	1.800 x 2.300 mm
	2.000 x 2.500 mm
	2.500 x 3.000 mm

Industrial hingest door with robust design suitable for intensive use in High Care food production and storage areas or as a partition between indoor and outdoor environments.

Available option Square window

The industrial sliding door has been developed for daily intensive use in refrigerated, freezer, and temperature-controlled areas with an elevated food safety risk. Design in accordance with hygienic guidelines, featuring beveled edges and rounded components to prevent the accumulation of dirt or rinse water. The robust stainless steel door leaf frame, welded at the corners, provides additional protection against potential damage.

HYGIENIC DOOR	
Hygienic, hard-wearing	
Door leaf	Thickness 40 mm
	Aluminium profile
	CleanSheet RAL 9010
	Core of CFC-free polyurethane
Door frame	Anodized aluminium
	From 74 - 200 mm wall thickness
Door fittings	Hinges: Dorma 4005
	Lock housing: Assa 565
	Handle: Dorma DH 720

HYGIENIC SLIDING DOOR	
Hygienic, hard-wearing	
Door leaf	Thickness 40 mm
	Aluminium profile
	CleanSheet RAL 9010
	Core of CFC-free polyurethane
Frame	Anodized aluminium
	From 70 - 195 mm wall thickness
Railsystem	Included

The Hygienic Door features a CleanSheet (FRP) door leaf with 40mm polyurethane insulation. Available as single or double doors, it can include a vision panel with laminated or thermopane glass.

The Hygienic Sliding Door is fully moisture-proof, featuring a CleanSheet door leaf with a shock-resistant aluminum edge and a polyurethane core. It includes sealing strips and a bottom guide for added functionality. The sliding door can also be equipped with an automation system

INSTALLATION MATERIALS

GLUE AND SEALANTS

HygiSeal 3.1 is our preferred one-component hybrid polymer sealant, specially designed for durable and hygienic joints in environments with stringent hygiene standards. Ideal applications include cleanrooms, laboratories, production areas, wet rooms, packaging areas, kitchens, and more.

HYGISEAL 3.1	
Chemical welding of joints	
Article code	HS3.1 RAL 9016
	HS3.1_9002 RAL 9002

HS-Code	82 02 99 20

SPACER_BASE	
Spacer to level CleanSheet laminated panels	
Adjustable from 3 to 23 mm	
Package	250 pc / box
Suitable for	RamPanel and RenoPanel

SPACER_CAP	
Spacer to level CleanSheet laminated panels	
Adjustable from 3 to 23 mm	
Package	250 pc / box
Suitable for	RamPanel and RenoPanel

OTHER INSTALLATION EQUIPMENT

PESCREW5X60	
Screw Inox A2 - 5x60 mm	
Material	Stainless steel
Package	200 pc per box
Weight	0,615 kg
HS-Code	73 18 15 30
Suitable for	Polyethylene strips (model 2-5)

PESCREW5X100	
Screw Inox A2 - 5x100 mm	
Material	Stainless steel
Package	100 pc per box
Weight	0,60 kg
HS-Code	73 18 15 30
Suitable for	Polyethylene strips (model 1)

PEPLUG	
Nylon plug 6x50mm	
Material	Plastic
Package	100 pc per box
Weight	0,30 kg
HS-Code	39 26 90 97
Suitable for	Screw Inox A2

MAINTENANCE & REPAIR

HYGICLEAN1	
Cleaner for organic soiling	
Base	Cleaning agent, alcohol, additives, fragrance and demineralised water
Package	Bottle of 1 L + dispen
Weight	1,1 kg
HS-Code	34 02 90 10
Suitable for	FRP sheets and panels, kerbs and skirtings

DEGREASER	
Degreaser for removal of dust, adhesive residues and other markings	
Base	Mixed aliphatic hydrocarbons
Package	Bottle of 1 L
Weight	1 kg
HS-Code	34 02 90 10
Suitable for	See TDS

STAINLESS STEEL CLEANER	
Stainless steel cleaner	
Package	Bottle of 500 ml
Weight	1 kg
HS-Code	29 15 31 00
Suitable for	Stainless steel kerbs, profiles and bollards and barriers

HYGIGUM	
Cleaning sponge to remove soiling from hard surfaces
